PRODUCT DETAILS

INTERLOCKING TEETH

The new environmental protection engineering plastic with steel characteristics, the elastic clip and the interlocking tooth clip design are used to hold the articles more firmly.

WAVY

The fashionable and beautiful big wave design is more atmospheric and beautiful, and the product has better contact and skid resistance.

MOUNTAINEERING BUCKLE AND IRON RING

After improvement and renewal, the mountaineering buckle and iron ring are added to make the product more widely used, stronger in bearing weight and better in durability.

Use cases

1. ergonomic design is adopted, which can be opened and closed when pinched gently, so it is convenient to use at any time
2. with good elasticity and firm grip, gloves can be with you anytime, anywhere!
