1. Selection of high-quality materials

Strictly select high quality raw materials, not afraid of wind, sun, and rain.

2. Bold pedals

The resin pedals have a bold design, with surface texture to increase friction and good load bearing.

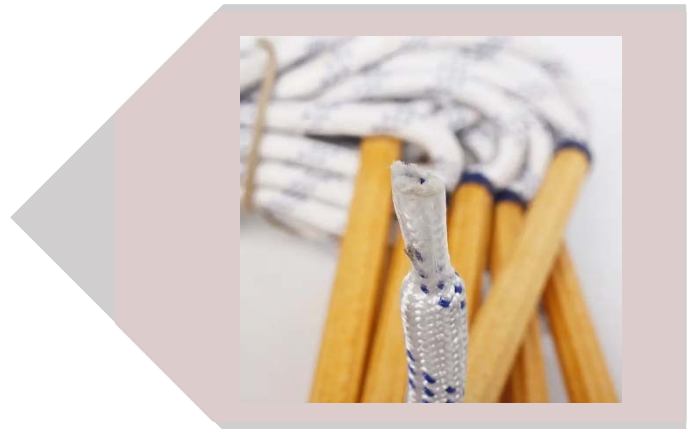

3. Metal hook

Metal hook design, the product is solid and practical, good load bearing, and easy to install.

4. Complete specifications

Both aluminum alloy and resin version can be customized to meet your different needs.

5. Metal Carabiners

The ladder is supplied with two heavy duty carabiners, for easy and steady installation.
